Spartica®
(4 Rib Split)

Unit Properties:
• Units exceed ASTM C-90. Higher strength units allow for more efficient structural designs.
• Recommend all units be manufactured with proper dose of integral admixture for water repellency and test units to ensure performance.
• All units are shipped on pallets. The pallets are wrapped and labeled to ensure units are clean and dry and to reduce potential chippage.

Installation Tips:
• Well tooled mortar joints and mortar color ensure natural appearances.
