The Beauty of Brick and the Economy of Concrete Masonry
Spec-Brik® provides architects, developers and contractors with a cost effective, convenient masonry option.

SPEC-BRIK® Advantages:

- Increased speed of construction.
- Wide variety of colors that look like brick.
- Nationwide availability.
- Now featuring Water Control Technology for dry single wythe walls.
- Energy efficient.
- Mold and fire resistant.
- Smooth, brick like textures.
- Minimal maintenance required.
- Produced locally, readily available, assuring quick delivery.
- These benefits make Spec-Brik® an attractive and logical alternative to other wall systems.

Spec-Brik® is manufactured to job specifications and delivered quickly.

Spec-Brik®, your first choice for an economical, load-bearing wall system.

Now available with WATER CONTROL TECHNOLOGY™ built in for superior resistance to moisture penetration!

Water Control Technology is an innovative new masonry unit design that resists moisture penetration by diverting water downward into the wall’s drainage system. Ask your CPG representative for more information!

Colors

SPEC-BRIK is available in 12 Standard Colors (custom colors are available)

The colors above are digital renderings of blended Spec-Brik colors. Due to the limitations of the printing process and the importance of viewing masonry materials under realistic site lighting conditions, we strongly recommend viewing a sample board before making color selections and using a jobsite sample panel as the basis for acceptance of the final work.
Nationwide Availability

The Concrete Products Group LLC (CPG) consists of regional market leaders in the concrete products industry. The CPG is organized to provide consistent, top-quality products to regional and national customers. Our SPEC-BRIK™ products are produced with consistent specifications and production expertise.
